Thin Solid Films 338 (1999) 327–331

thin solid films

Subject Index of Volume 338

Absorption
Vacuum-deposited films of liquid crystal molecules of 4-n-alkoxy-4'-cyanobiphenyls: Their electronic spectra and molecular aggregate structures, 243
a-C:H
Tribological properties of a-C:H multilayer structures, 172
Aluminum
Liquid phase epitaxial growth of AlGaInPAs on GaAs substrates, 220
Angular distribution
Angular distribution of sputtered atoms in physical vapor deposition and collimated sputtering, 81
Annealing
Effect of annealing conditions on the leakage current characteristics of ferroelectric PZT thin films grown by sol–gel process, 149
Radiation damage in air annealed indium tin oxide layers, 197
Influence of annealing on the magnetic properties of alternate deposited Co/Mo thin filmInfluence of annealing on the magnetic properties of alternate deposited Co/Mo thin film, 314
Atomic force microscopy
Growth of $In_xGa_{1-x}N$ thin films on indium tin oxide/glass substrates by RF plasma enhanced chemical vapor deposition, 9
A rotating electrochemical cell to prepare porous silicon with different surface structures, 100
Nanostructure of Ge deposited on Si(001), a study by XPS peak shape analysis and AFM, 165
Auger electron spectroscopy
Structural and electrical properties of Fe films grown on InP substrates, 161
Carbon
Effect of the substrate temperature on the deposition of hydrogenated amorphous carbon by PACVD at 35 kHz, 88
Carboxylic acids
The dissolution of myristic acid monolayers in water, 252
Chemical vapor deposition
A novel model of hydrogen plasma assisted chemical vapor deposition of copper, 24
W/Si multilayers deposited by hot-filament MOCVD, 70
Effect of the substrate temperature on the deposition of hydrogenated amorphous carbon by PACVD at 35 kHz, 88
Thin film transistors in low temperature as-deposited and reduced-crystallization-time polysilicon on 665°C strain point glass substrates, 281
Chemisorption
The interaction of oxygen with nanocrystalline SnO_2 thin films in the framework of the electron theory of adsorption, 276
Chopping frequency
Chopping effect on the crystallinity of ZnO films prepared by a r.f. planar magnetron sputtering method, 265
Clusters
Structural studies on silver cluster films deposited on softened PVP substrates, 40
Cobalt
Influence of annealing on the magnetic properties of alternate deposited Co/Mo thin filmInfluence of annealing on the magnetic properties of alternate deposited Co/Mo thin film, 314
Collimation
Angular distribution of sputtered atoms in physical vapor deposition and collimated sputtering, 81
Conductivity
Epitaxial relationships and electrical properties of vanadium oxide films on *r*-cut sapphire, 60
Contacts
Electrical and chemical sensing properties of doped polypyrrole/gold Schottky barrier diodes, 142
Copper
A novel model of hydrogen plasma assisted chemical vapor deposition of copper, 24
Copper indium disulfide
Structural and optical properties of sprayed $CuInS_2$ films, 125
Crystallization
Thin film transistors in low temperature as-deposited and reduced-crystallization-time polysilicon on 665°C strain point glass substrates, 281
SiC formation and influence on the morphology of polycrystalline silicon thin films on graphite substrates produced by zone melting recrystallization, 320
Deposition process
Properties of sprayed YBCO films on YSZ substrates, 118
Vacuum-deposited films of liquid crystal molecules of 4-n-alkoxy-4'-cyanobiphenyls: Their electronic spectra and molecular aggregate structures, 243
DX center
Characteristics of electron traps in Si-doped $Ga_{0.51}In_{0.49}P$ and electrical properties of modulation doped GaInP/InGaAs/GaAs heterostructures, 213
Electrical measurements
Properties of sprayed YBCO films on YSZ substrates, 118
Electrical properties
Properties of sprayed YBCO films on YSZ substrates, 118
Electrical properties and measurements
Effect of annealing conditions on the leakage current characteristics of ferroelectric PZT thin films grown by sol–gel process, 149
Electrochemically polymerized polypyrrole

0040-6090/98/$ - see front matter © 1999 Elsevier Science S.A. All rights reserved.
PII: S0040-6090(98)01752-0

Electrical and chemical sensing properties of doped polypyrrole/gold Schottky barrier diodes, 142
Electrochemistry
Electrochromic properties of sol-gel deposited Ti-doped vanadium oxide film, 201
Electron microscopy
Structural studies on silver cluster films deposited on softened PVP substrates, 40
Native oxides on AlGaAs epilayer, 46
Growth mechanism of 2H–WS_2 thin films: a similar process to graphitization, 75
Electronic devices
A novel model of hydrogen plasma assisted chemical vapor deposition of copper, 24
Epitaxy
Epitaxial relationships and electrical properties of vanadium oxide films on *r*-cut sapphire, 60
Evaporation
Optical absorption studies on $AgInSe_2$ and $AgInTe_2$ thin films, 207
Fatigue limit
Influence of single- and multilayer TiN films on the axial tension and fatigue performance of AISI 1045 steel, 177
Flourescence
Vacuum-deposited films of liquid crystal molecules of 4-n-alkoxy-4'-cyanobiphenyls: Their electronic spectra and molecular aggregate structures, 243
Effect of magnetic field on growth of functional organic thin films, 300
Fluoropolymer films
Effects of photo-excitation and organic vapor treatment on vapor sorption behavior of sputtered fluoropolymer films, 291
Gadolinium
Structural domain growth of strained gadolinium on Mo(112), 1
Gallium arsenide
Native oxides on AlGaAs epilayer, 46
Liquid phase epitaxial growth of AlGaInPAs on GaAs substrates, 220
Gallium indium phosphide
Characteristics of electron traps in Si-doped $Ga_{0.51}In_{0.49}P$ and electrical properties of modulation doped GaInP/InGaAs/GaAs heterostructures, 213
Gallium phosphate
Indirect transitions in thin films due to the coulomb interactions between electrons, 185
GaN buffer layer
Growth of $In_xGa_{1-x}N$ thin films on indium tin oxide/glass substrates by RF plasma enhanced chemical vapor deposition, 9
Gas source molecular beam epitaxy
Characteristics of electron traps in Si-doped $Ga_{0.51}In_{0.49}P$ and electrical properties of modulation doped GaInP/InGaAs/GaAs heterostructures, 213
Gas-sensors
The characterization and gas-sensing properties of a novel amphiphilic phthalocyanine LB film, 286
Glass
Thin film transistors in low temperature as-deposited and reduced-crystallization-time polysilicon on 665°C strain point glass substrates, 281
Gold substrate
Nanometer-scale hole- and bit-modifications of oligosilane- and stearic acid-Langmuir–Blodgett films, 155
Graphite
SiC formation and influence on the morphology of polycrystalline silicon thin films on graphite substrates produced by zone melting recrystallization, 320
Graphitization
Growth mechanism of 2H–WS_2 thin films: a similar process to graphitization, 75
Growth
Growth mechanism of 2H–WS_2 thin films: a similar process to graphitization, 75
Growth mechanism
Growth of $CuInSe_2$ thin films by high vapour Se treatment of co-sputtered Cu-In alloy in a graphite container, 13
Heat treatment
Native oxides on AlGaAs epilayer, 46
Impurities
Effect of impurities on initial stages of phase formation for the system of Ti deposited on (001) Si–Ge layers, 110
$In_xGa_{1-x}N$
Growth of $In_xGa_{1-x}N$ thin films on indium tin oxide/glass substrates by RF plasma enhanced chemical vapor deposition, 9
Indium tin oxide
Radiation damage in air annealed indium tin oxide layers, 197
Indium tin oxide/glass
Growth of $In_xGa_{1-x}N$ thin films on indium tin oxide/glass substrates by RF plasma enhanced chemical vapor deposition, 9
Inidium phosphide
Structural and electrical properties of Fe films grown on InP substrates, 161
π–π Interaction
Effects of photo-excitation and organic vapor treatment on vapor sorption behavior of sputtered fluoropolymer films, 291
Ion assisted deposition
Influence of the assisting-ion-beam parameters on the laser-damage threshold of SiO_2 films, 269
Iron
Structural and electrical properties of Fe films grown on InP substrates, 161
Iron oxide
Ultrathin Fe-oxide layers made from Langmuir–Blodgett films, 231
J-aggregates
Optical second harmonic images of merocyanine J-aggregate monolayers at the air–water interface, 5
Langmuir films
Optical second harmonic images of merocyanine J-aggregate monolayers at the air–water interface, 5
Langmuir–Blodgett films
Nanometer-scale hole- and bit-modifications of oligosilane- and stearic acid-Langmuir–Blodgett films, 155
Ultrathin Fe-oxide layers made from Langmuir–Blodgett films, 231
The dissolution of myristic acid monolayers in water, 252
The characterization and gas-sensing properties of a novel amphiphilic phthalocyanine LB film, 286
Laser ablation

Plasma activated pulsed laser deposition for synthesis of particle-free $La_{2-x}Sr_xCuO_4$ films, 20
The preparation of single-crystal 4H-SiC film by pulsed XeCl laser deposition, 93
On ageing and critical thickness of $Yba_2Cu_3O_7$ films on Si with CeO_2/YSZ buffer layers, 224
LIDT
Influence of the assisting-ion-beam parameters on the laser-damage threshold of SiO_2 films, 269
Liquid phase epitaxy
Liquid phase epitaxial growth of AlGaInPAs on GaAs substrates, 220
Low energy electron diffraction
Structural domain growth of strained gadolinium on Mo(112), 1
Luminescence
A comparative study of electroluminescence from nanosize Si particle embedded silicon oxide films and that from nanosize Ge particle embedded silicon oxide films, 131
Magnetic orientation
Effect of magnetic field on growth of functional organic thin films, 300
Magnetic properties and measurements
Influence of annealing on the magnetic properties of alternate deposited Co/Mo thin filmInfluence of annealing on the magnetic properties of alternate deposited Co/Mo thin film, 314
Magnetron sputtering
Room temperature behavior of TiN thin films, 304
Merocyanine dye
Optical second harmonic images of merocyanine J-aggregate monolayers at the air–water interface, 5
Mirage technique
Influence of the assisting-ion-beam parameters on the laser-damage threshold of SiO_2 films, 269
Modification
Nanometer-scale hole- and bit-modifications of oligosilane- and stearic acid-Langmuir–Blodgett films, 155
Modulation doped field-effect transistor
Characteristics of electron traps in Si-doped $Ga_{0.51}In_{0.49}P$ and electrical properties of modulation doped GaInP/InGaAs/GaAs heterostructures, 213
Molybdenum
Influence of annealing on the magnetic properties of alternate deposited Co/Mo thin filmInfluence of annealing on the magnetic properties of alternate deposited Co/Mo thin film, 314
Monolayers
Optical second harmonic images of merocyanine J-aggregate monolayers at the air–water interface, 5
Ultrathin Fe-oxide layers made from Langmuir–Blodgett films, 231
The dissolution of myristic acid monolayers in water, 252
Multilayer coating
Influence of single- and multilayer TiN films on the axial tension and fatigue performance of AISI 1045 steel, 177
Multilayers
W/Si multilayers deposited by hot-filament MOCVD, 70
Tribological properties of a-C:H multilayer structures, 172
On ageing and critical thickness of $Yba_2Cu_3O_7$ films on Si with CeO_2/YSZ buffer layers, 224
Nanostructures
A rotating electrochemical cell to prepare porous silicon with different surface structures, 100
A comparative study of electroluminescence from nanosize Si particle embedded silicon oxide films and that from nanosize Ge particle embedded silicon oxide films, 131
Octamethylcyclotetrasiloxane
Characterization of silicon oxide thin films deposited by plasma enhanced chemical vapour deposition from octamethylcyclotetrasiloxane/oxygen feeds, 49
Oligosilane
Nanometer-scale hole- and bit-modifications of oligosilane- and stearic acid-Langmuir–Blodgett films, 155
Optical absorption
Growth of $In_xGa_{1-x}N$ thin films on indium tin oxide/glass substrates by RF plasma enhanced chemical vapor deposition, 9
Optical coatings
Electrochromic properties of sol-gel deposited Ti-doped vanadium oxide film, 201
Optical properties
Microstructure and optical properties of amorphous TiO_2-SiO_2 composite films synthesized by helicon plasma sputtering, 105
Structural and optical properties of sprayed $CuInS_2$ films, 125
Indirect transitions in thin films due to the coulomb interactions between electrons, 185
Distribution of radiation intensity in a thin semiconductor film on a thick substrate, 188
Optical absorption studies on $AgInSe_2$ and $AgInTe_2$ thin films, 207
Optical spectroscopy
Electrochromic properties of sol-gel deposited Ti-doped vanadium oxide film, 201
Optoelectronics
Radiation damage in air annealed indium tin oxide layers, 197
Organic dyes
Effect of magnetic field on growth of functional organic thin films, 300
Organic vapor sorption
Effects of photo-excitation and organic vapor treatment on vapor sorption behavior of sputtered fluoropolymer films, 291
Oxidation
Native oxides on AlGaAs epilayer, 46
Oxygen
The interaction of oxygen with nanocrystalline SnO_2 thin films in the framework of the electron theory of adsorption, 276
Particle radiation damage
Radiation damage in air annealed indium tin oxide layers, 197
Phase transitions
Effect of impurities on initial stages of phase formation for the system of Ti deposited on (001) Si–Ge layers, 110
Photoacoustic
Influence of the assisting-ion-beam parameters on the laser-damage threshold of SiO_2 films, 269
Photoconductivity
Distribution of radiation intensity in a thin semiconductor film on a thick substrate, 188
Photo-excitation

Effects of photo-excitation and organic vapor treatment on vapor sorption behavior of sputtered fluoropolymer films, 291
Phthalocyanine
The characterization and gas-sensing properties of a novel amphiphilic phthalocyanine LB film, 286
Physical vapor deposition
Angular distribution of sputtered atoms in physical vapor deposition and collimated sputtering, 81
Plasma enhanced CVD
Characterization of silicon oxide thin films deposited by plasma enhanced chemical vapour deposition from octamethylcyclotetrasiloxane/oxygen feeds, 49
Plasma processing and deposition
Plasma activated pulsed laser deposition for synthesis of particle-free $La_{2-x}Sr_xCuO_4$ films, 20
A novel model of hydrogen plasma assisted chemical vapor deposition of copper, 24
Effect of the substrate temperature on the deposition of hydrogenated amorphous carbon by PACVD at 35 kHz, 88
Microstructure and optical properties of amorphous TiO_2-SiO_2 composite films synthesized by helicon plasma sputtering, 105
Tribological properties of a-C:H multilayer structures, 172
Polymers
Structural studies on silver cluster films deposited on softened PVP substrates, 40
Electrical and chemical sensing properties of doped polypyrrole/gold Schottky barrier diodes, 142
PZT
Effect of annealing conditions on the leakage current characteristics of ferroelectric PZT thin films grown by sol–gel process, 149
Quantitative analysis
Nanostructure of Ge deposited on Si(001), a study by XPS peak shape analysis and AFM, 165
Quantum effects
Indirect transitions in thin films due to the coulomb interactions between electrons, 185
Radio frequency plasma enhanced chemical vapor deposition
Growth of $In_xGa_{1-x}N$ thin films on indium tin oxide/glass substrates by RF plasma enhanced chemical vapor deposition, 9
Radio-frequency sputtering
Effects of photo-excitation and organic vapor treatment on vapor sorption behavior of sputtered fluoropolymer films, 291
Scanning electron microscopy
Radiation damage in air annealed indium tin oxide layers, 197
Scanning tunneling microscope
Nanometer-scale hole- and bit-modifications of oligosilane- and stearic acid-Langmuir–Blodgett films, 155
Scanning tunneling microscopy
Structural domain growth of strained gadolinium on Mo(112), 1
Schottky barrier diodes
Electrical and chemical sensing properties of doped polypyrrole/gold Schottky barrier diodes, 142
Second harmonic generation microscope
Optical second harmonic images of merocyanine J-aggregate monolayers at the air–water interface, 5
Selenides
Growth of $CuInSe_2$ thin films by high vapour Se treatment of co-sputtered Cu-In alloy in a graphite container, 13
Semiconductors
The preparation of single-crystal 4H-SiC film by pulsed XeCl laser deposition, 93
Indirect transitions in thin films due to the coulomb interactions between electrons, 185
Distribution of radiation intensity in a thin semiconductor film on a thick substrate, 188
Liquid phase epitaxial growth of AlGaInPAs on GaAs substrates, 220
Thin film transistors in low temperature as-deposited and reduced-crystallization-time polysilicon on 665°C strain point glass substrates, 281
Sensor
The interaction of oxygen with nanocrystalline SnO_2 thin films in the framework of the electron theory of adsorption, 276
Silicides
Effect of impurities on initial stages of phase formation for the system of Ti deposited on (001) Si–Ge layers, 110
Silicon carbide
The preparation of single-crystal 4H-SiC film by pulsed XeCl laser deposition, 93
SiC formation and influence on the morphology of polycrystalline silicon thin films on graphite substrates produced by zone melting recrystallization, 320
Silicon
W/Si multilayers deposited by hot-filament MOCVD, 70
A rotating electrochemical cell to prepare porous silicon with different surface structures, 100
On ageing and critical thickness of $Yba_2Cu_3O_7$ films on Si with CeO_2/YSZ buffer layers, 224
Silicon oxide
Microstructure and optical properties of amorphous TiO_2-SiO_2 composite films synthesized by helicon plasma sputtering, 105
A comparative study of electroluminescence from nanosize Si particle embedded silicon oxide films and that from nanosize Ge particle embedded silicon oxide films, 131
Silicon oxide films
Characterization of silicon oxide thin films deposited by plasma enhanced chemical vapour deposition from octamethylcyclotetrasiloxane/oxygen feeds, 49
Silver
Structural studies on silver cluster films deposited on softened PVP substrates, 40
Single layer coating
Influence of single- and multilayer TiN films on the axial tension and fatigue performance of AISI 1045 steel, 177
Sol-gel
Stress development in amorphous zirconium oxide films prepared by sol-gel processing, 136
Sol–gel process
Effect of annealing conditions on the leakage current characteristics of ferroelectric PZT thin films grown by sol–gel process, 149
Solar applications
Growth mechanism of 2H–WS_2 thin films: a similar process to graphitization, 75
Solar cells

Growth of $CuInSe_2$ thin films by high vapour Se treatment of co-sputtered Cu-In alloy in a graphite container, 13
Spray pyrolysis
Structural and optical properties of sprayed $CuInS_2$ films, 125
Sputtering
Growth of $CuInSe_2$ thin films by high vapour Se treatment of co-sputtered Cu-In alloy in a graphite container, 13
Angular distribution of sputtered atoms in physical vapor deposition and collimated sputtering, 81
Chopping effect on the crystallinity of ZnO films prepared by a r.f. planar magnetron sputtering method, 265
Stearic acid
Nanometer-scale hole- and bit-modifications of oligosilane- and stearic acid-Langmuir–Blodgett films, 155
Stress
Stress development in amorphous zirconium oxide films prepared by sol-gel processing, 136
On ageing and critical thickness of $Yba_2Cu_3O_7$ films on Si with CeO_2/YSZ buffer layers, 224
Structural properties
Effect of the substrate temperature on the deposition of hydrogenated amorphous carbon by PACVD at 35 kHz, 88
Structural and optical properties of sprayed $CuInS_2$ films, 125
Optical absorption studies on $AgInSe_2$ and $AgInTe_2$ thin films, 207
Superconductivity
Plasma activated pulsed laser deposition for synthesis of particle-free $La_{2-x}Sr_xCuO_4$ films, 20
Properties of sprayed YBCO films on YSZ substrates, 118
Surface morphology
Plasma activated pulsed laser deposition for synthesis of particle-free $La_{2-x}Sr_xCuO_4$ films, 20
A rotating electrochemical cell to prepare porous silicon with different surface structures, 100
Nanostructure of Ge deposited on Si(001), a study by XPS peak shape analysis and AFM, 165
Vacuum-deposited films of liquid crystal molecules of 4-n-alkoxy-4'-cyanobiphenyls: Their electronic spectra and molecular aggregate structures, 243
SiC formation and influence on the morphology of polycrystalline silicon thin films on graphite substrates produced by zone melting recrystallization, 320
Surface thermodynamics
The dissolution of myristic acid monolayers in water, 252
Ternary compounds
Optical absorption studies on $AgInSe_2$ and $AgInTe_2$ thin films, 207
Thin films
Growth mechanism of 2H–WS_2 thin films: a similar process to graphitization, 75
Thin film growth
Structural domain growth of strained gadolinium on Mo(112), 1
TiN films
Room temperature behavior of TiN thin films, 304
Tin oxide
The interaction of oxygen with nanocrystalline SnO_2 thin films in the framework of the electron theory of adsorption, 276
Titanium nitride (TiN)
Influence of single- and multilayer TiN films on the axial tension and fatigue performance of AISI 1045 steel, 177
Titanium
Effect of impurities on initial stages of phase formation for the system of Ti deposited on (001) Si–Ge layers, 110
Titanium oxide
Microstructure and optical properties of amorphous TiO_2-SiO_2 composite films synthesized by helicon plasma sputtering, 105
Transmission electron microscopy
Structural and electrical properties of Fe films grown on InP substrates, 161
Tribology
Tribological properties of a-C:H multilayer structures, 172
Tungsten
W/Si multilayers deposited by hot-filament MOCVD, 70
Vanadium oxide
Epitaxial relationships and electrical properties of vanadium oxide films on *r*-cut sapphire, 60
Electrochromic properties of sol-gel deposited Ti-doped vanadium oxide film, 201
X-ray diffraction
Growth of $In_xGa_{1-x}N$ thin films on indium tin oxide/glass substrates by RF plasma enhanced chemical vapor deposition, 9
Epitaxial relationships and electrical properties of vanadium oxide films on *r*-cut sapphire, 60
Growth mechanism of 2H–WS_2 thin films: a similar process to graphitization, 75
Chopping effect on the crystallinity of ZnO films prepared by a r.f. planar magnetron sputtering method, 265
Effect of magnetic field on growth of functional organic thin films, 300
X-ray photoelectron spectroscopy
Nanostructure of Ge deposited on Si(001), a study by XPS peak shape analysis and AFM, 165
Zinc oxide
Chopping effect on the crystallinity of ZnO films prepared by a r.f. planar magnetron sputtering method, 265
Zirconium oxide
Stress development in amorphous zirconium oxide films prepared by sol-gel processing, 136
